Making application performance great

NPMD Market Research Survey Results

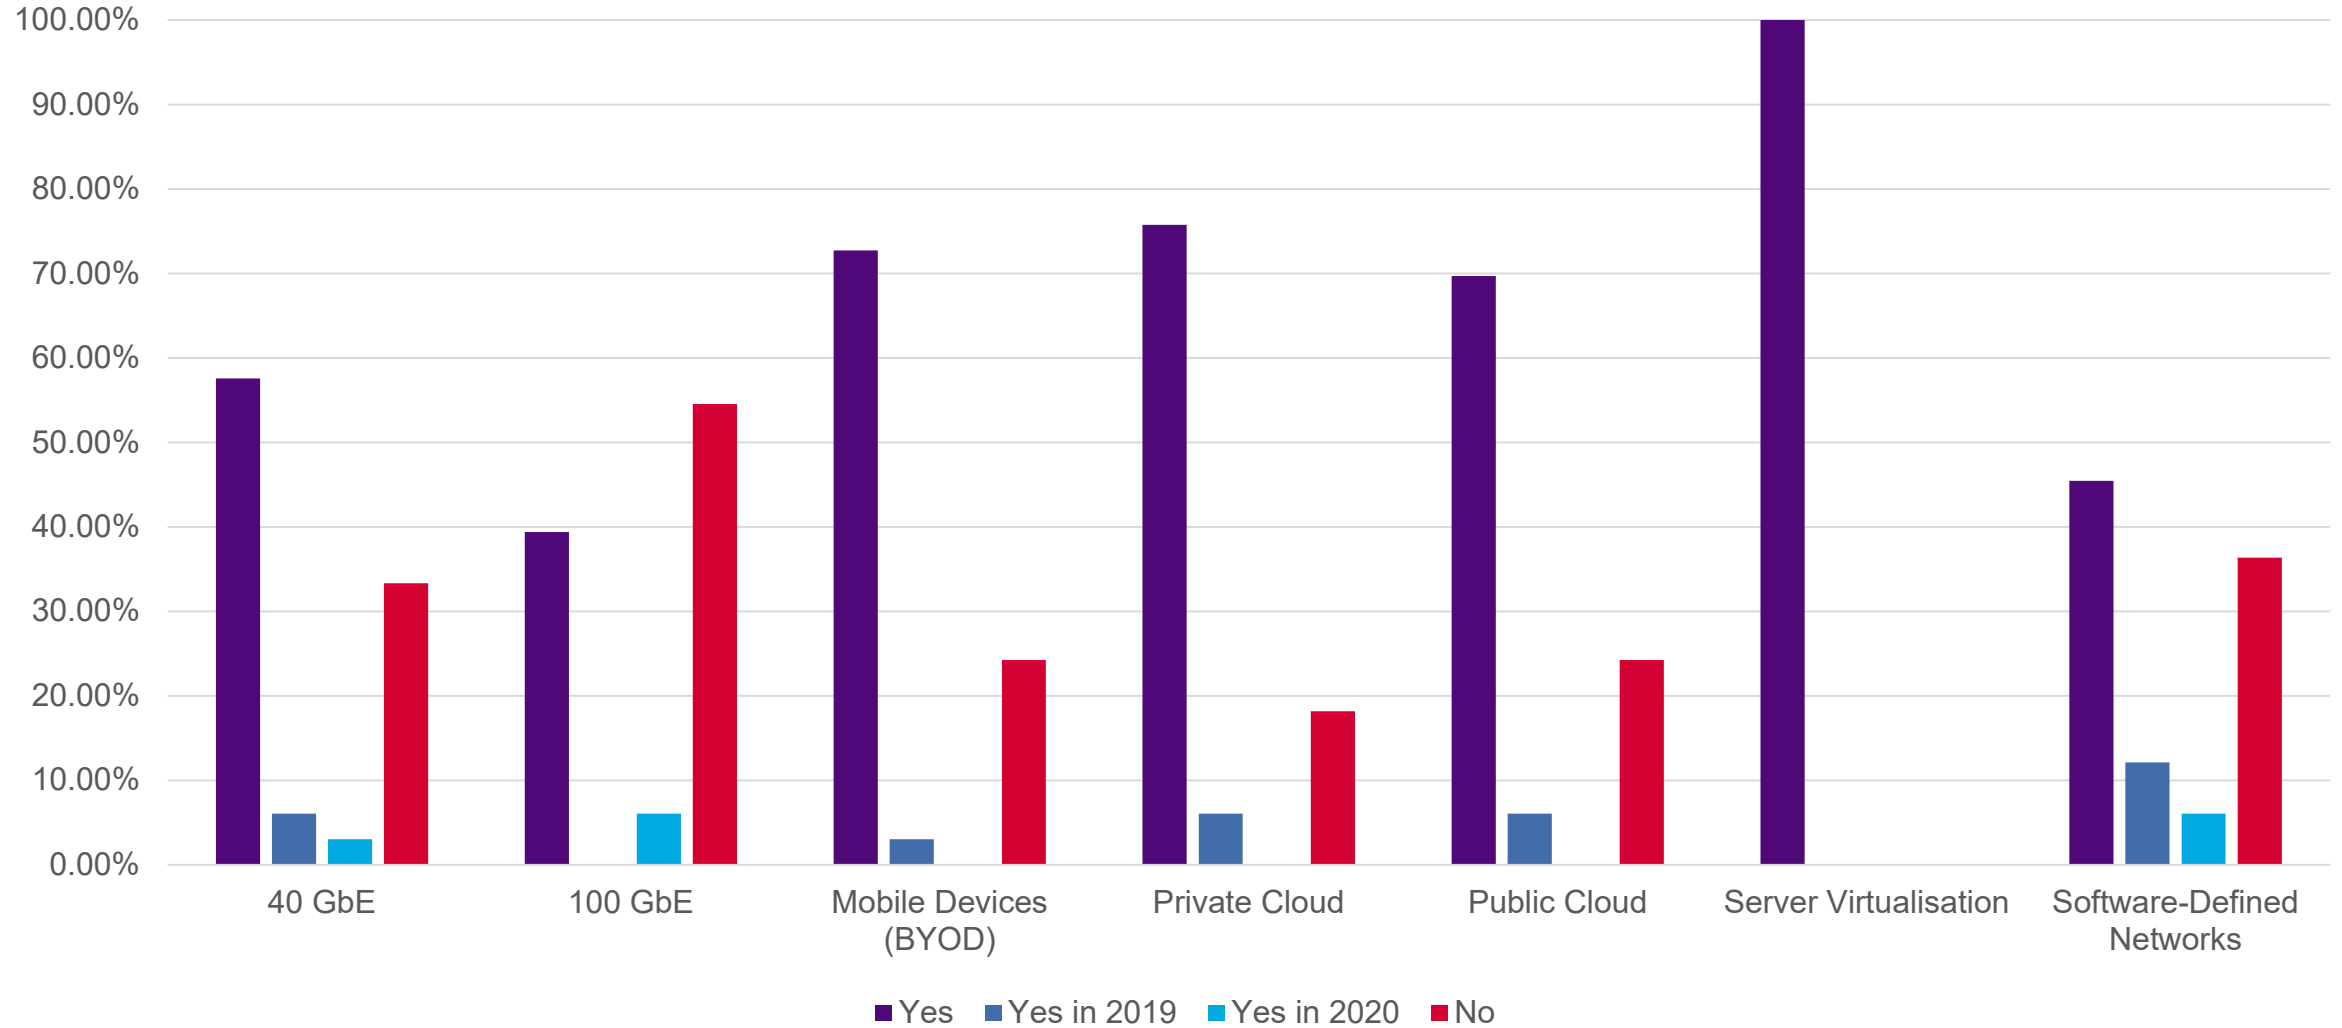

November 2018

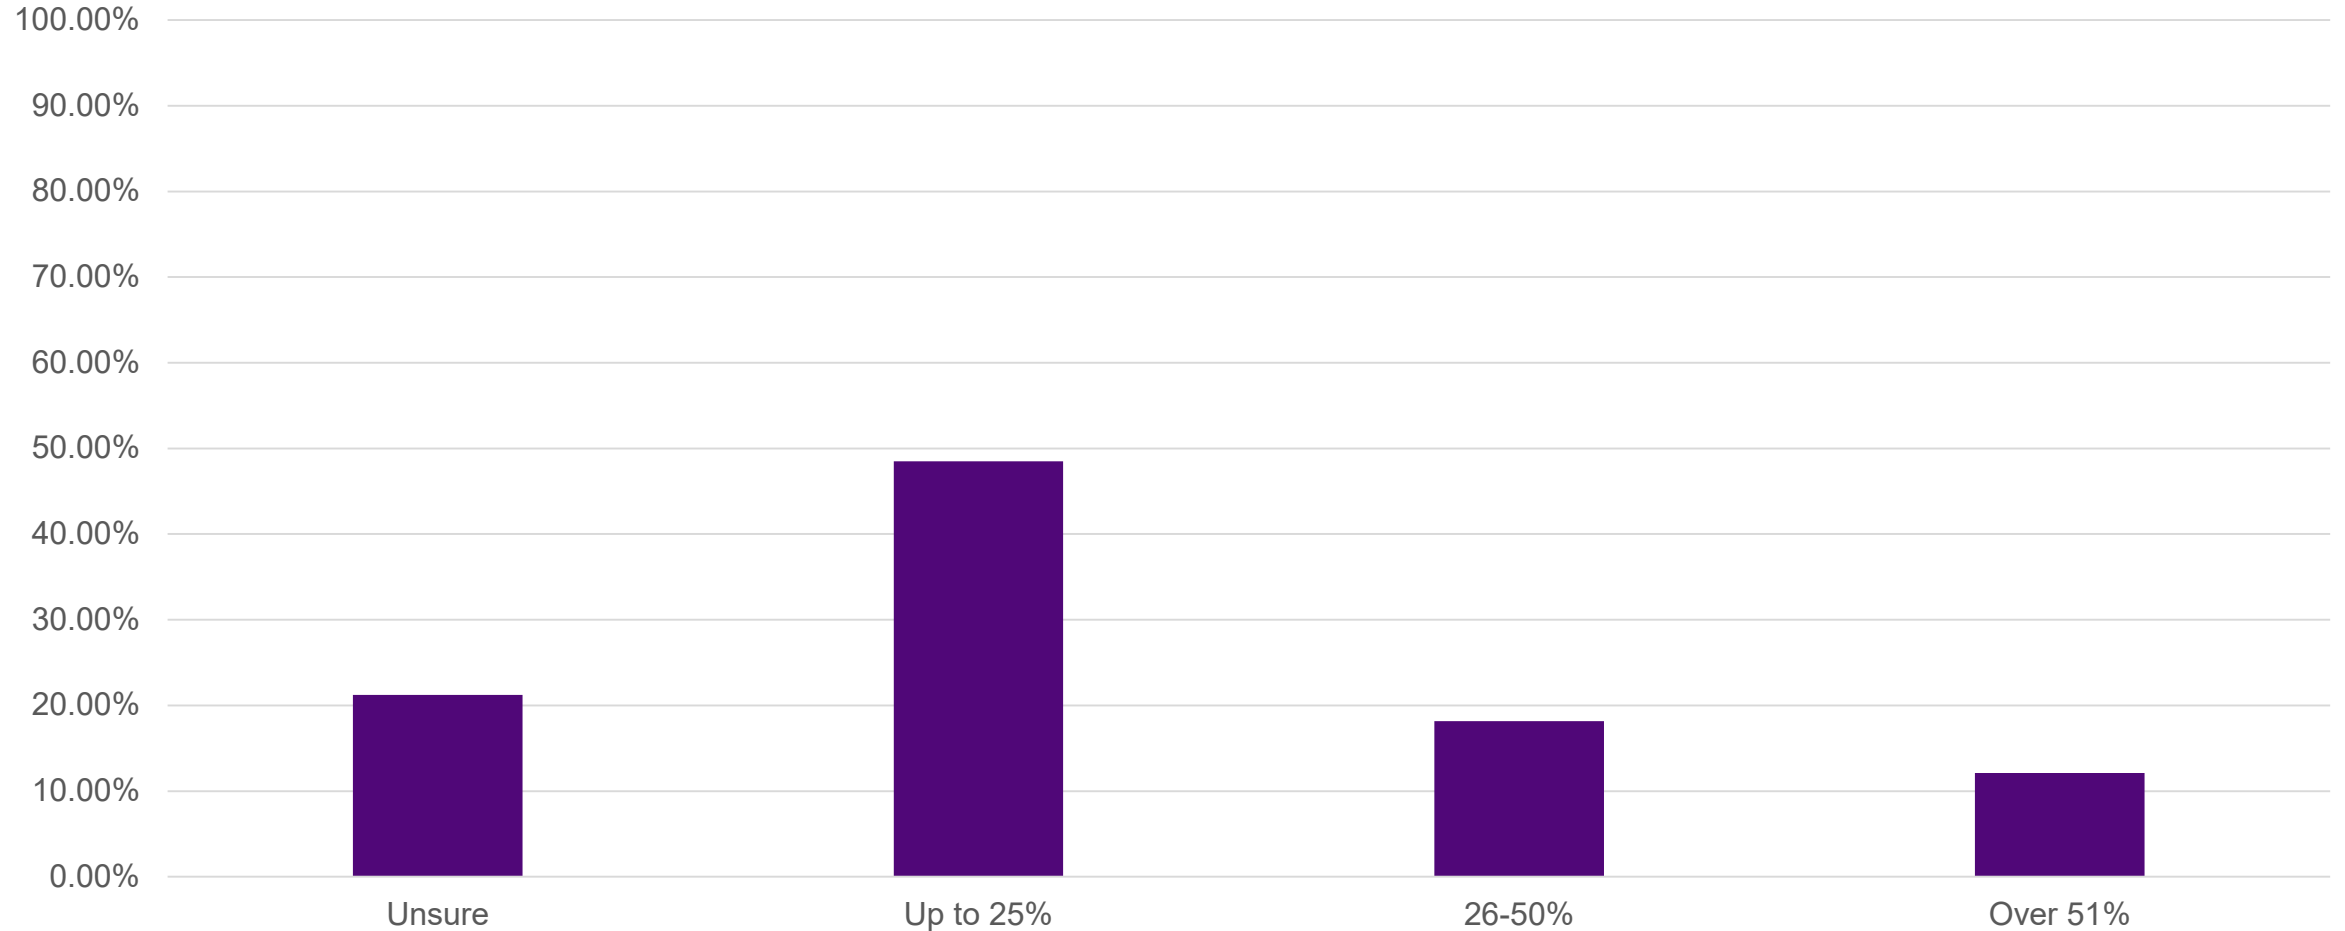

What type of networks do you manage?

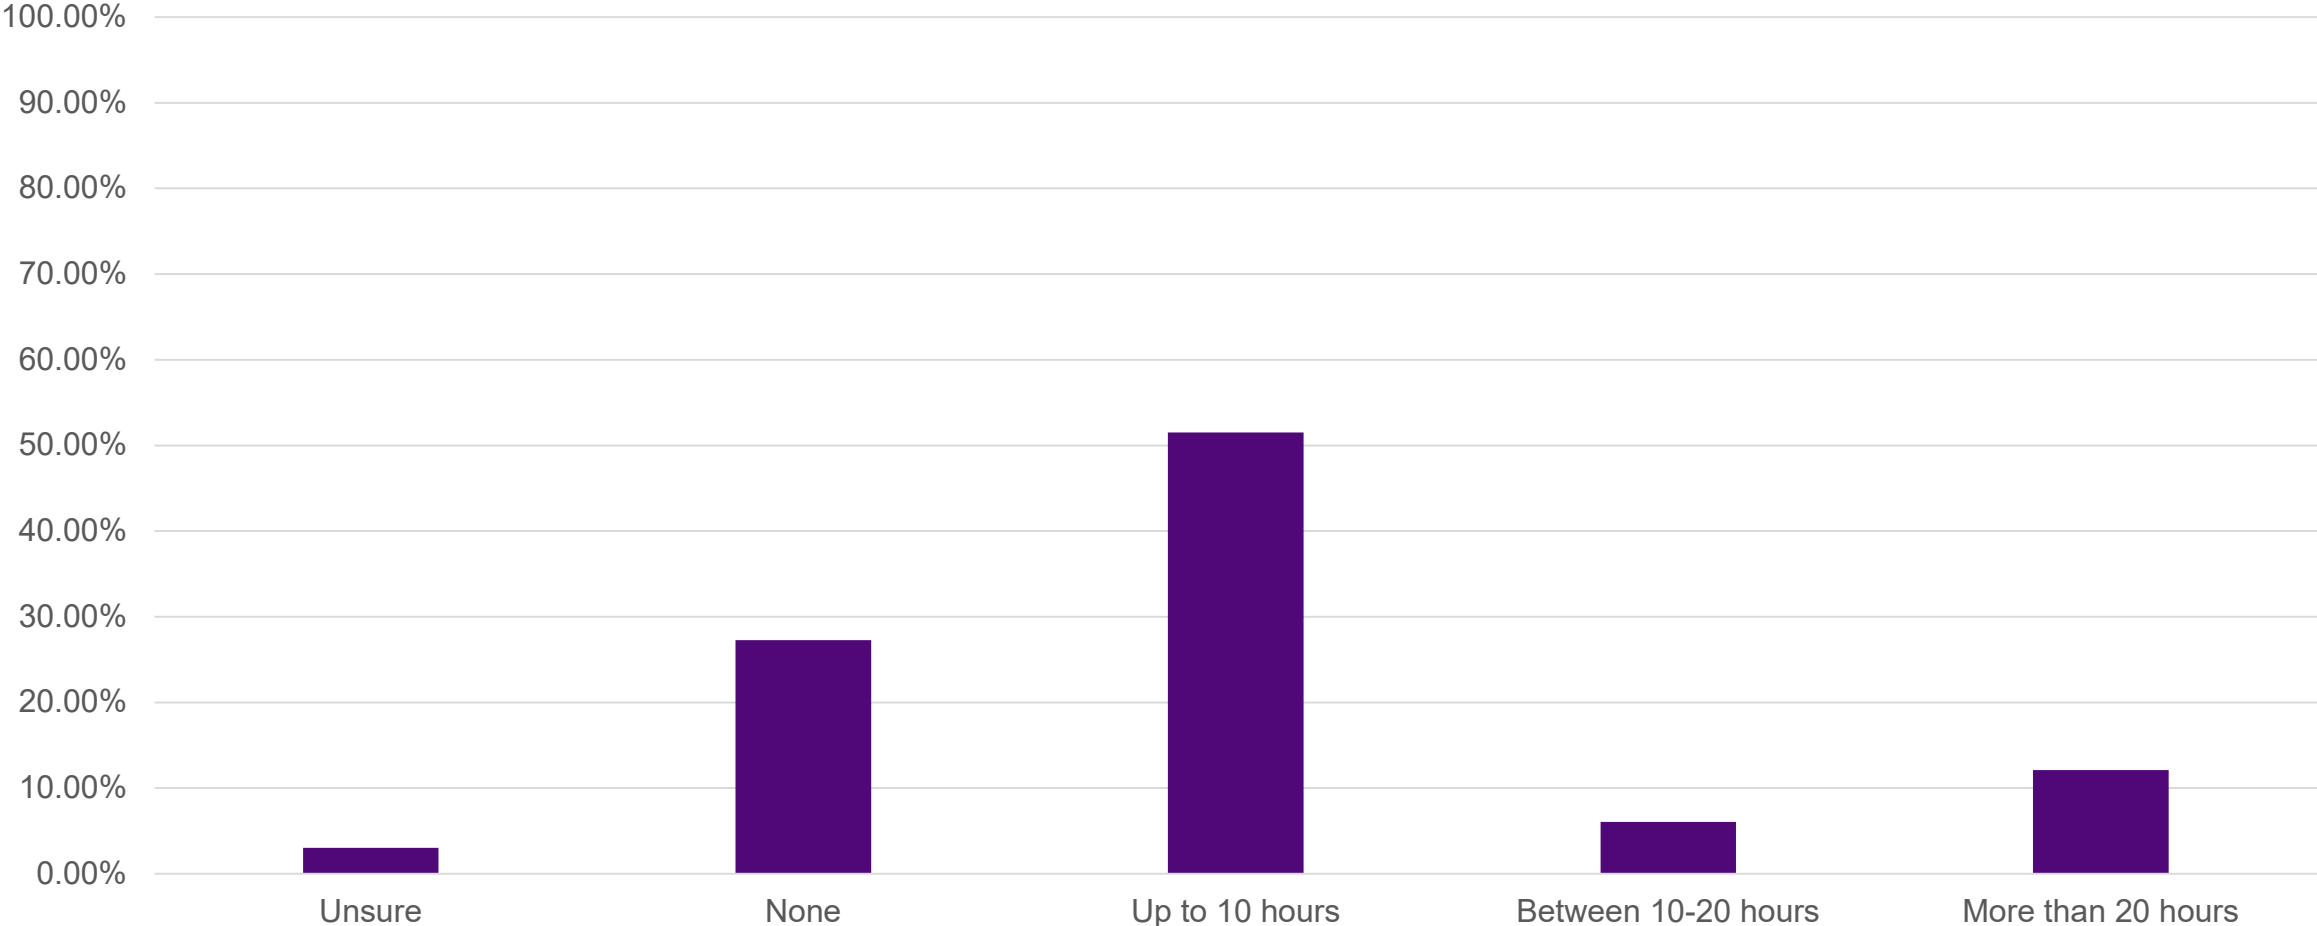

Which of these technologies have you adopted?

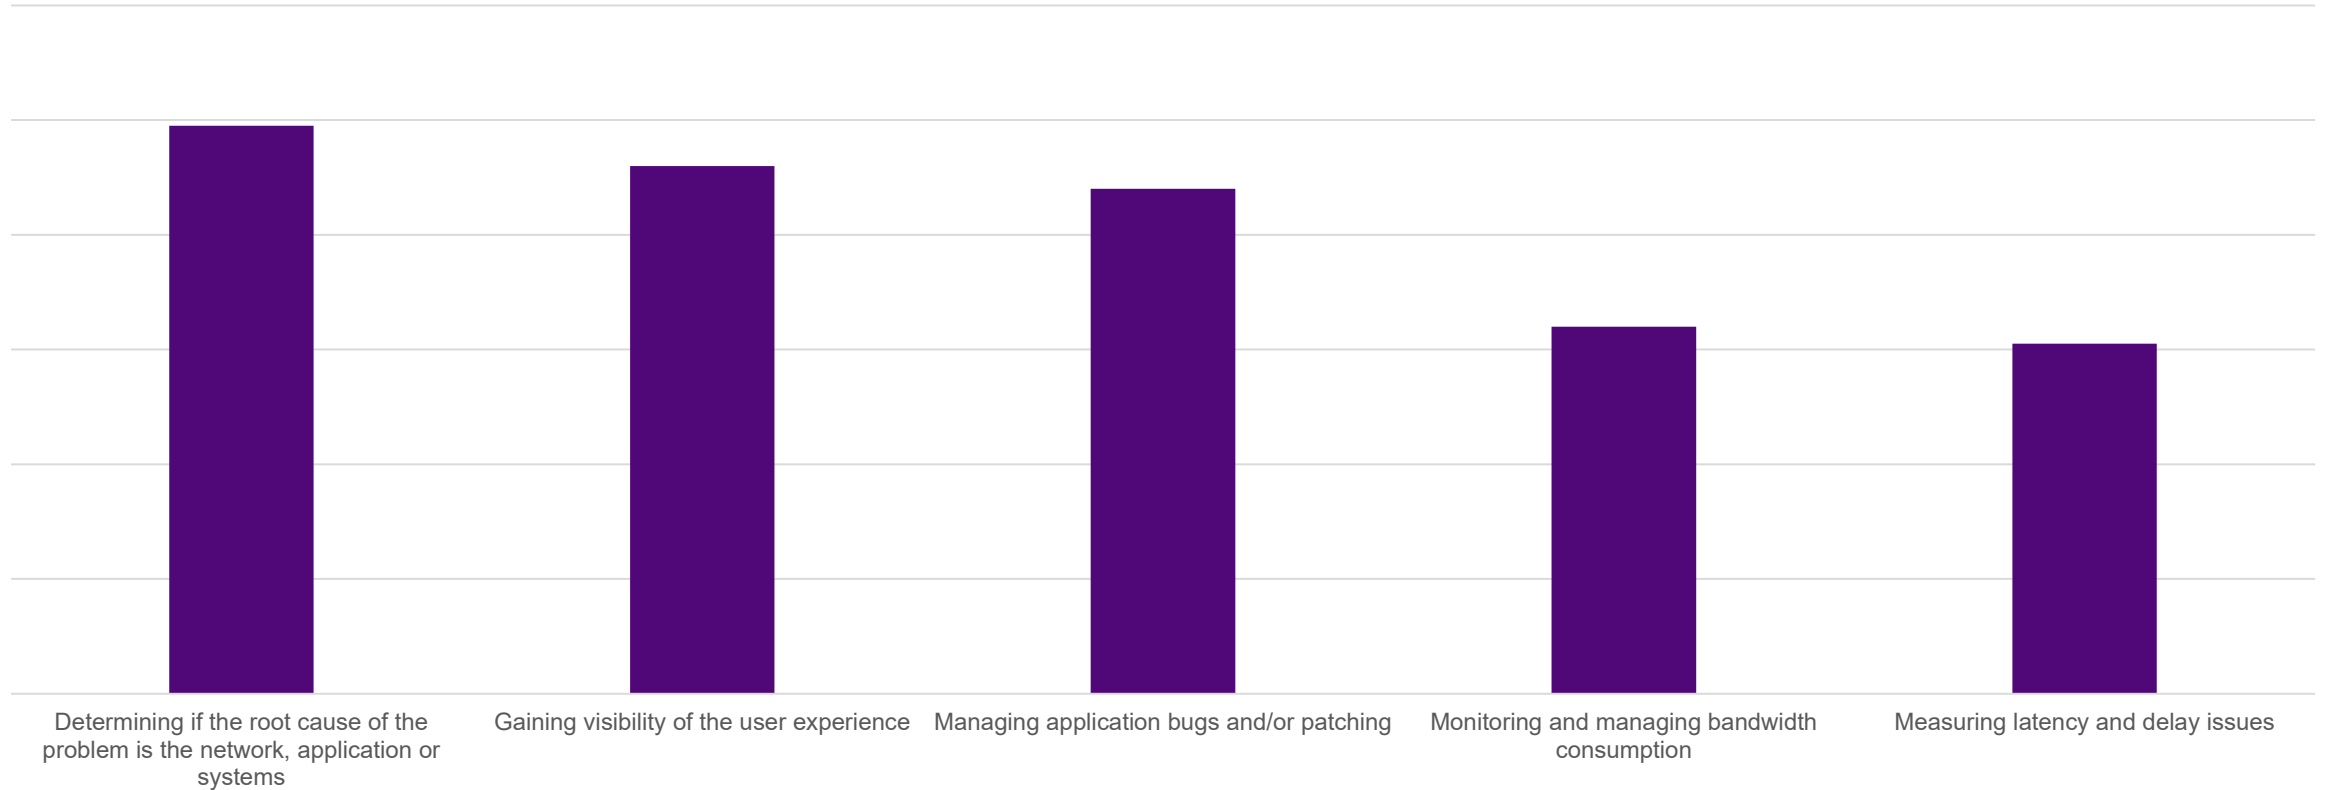

What percentage of your applications are in the cloud?

How many hours a week do you spend troubleshooting security issues?

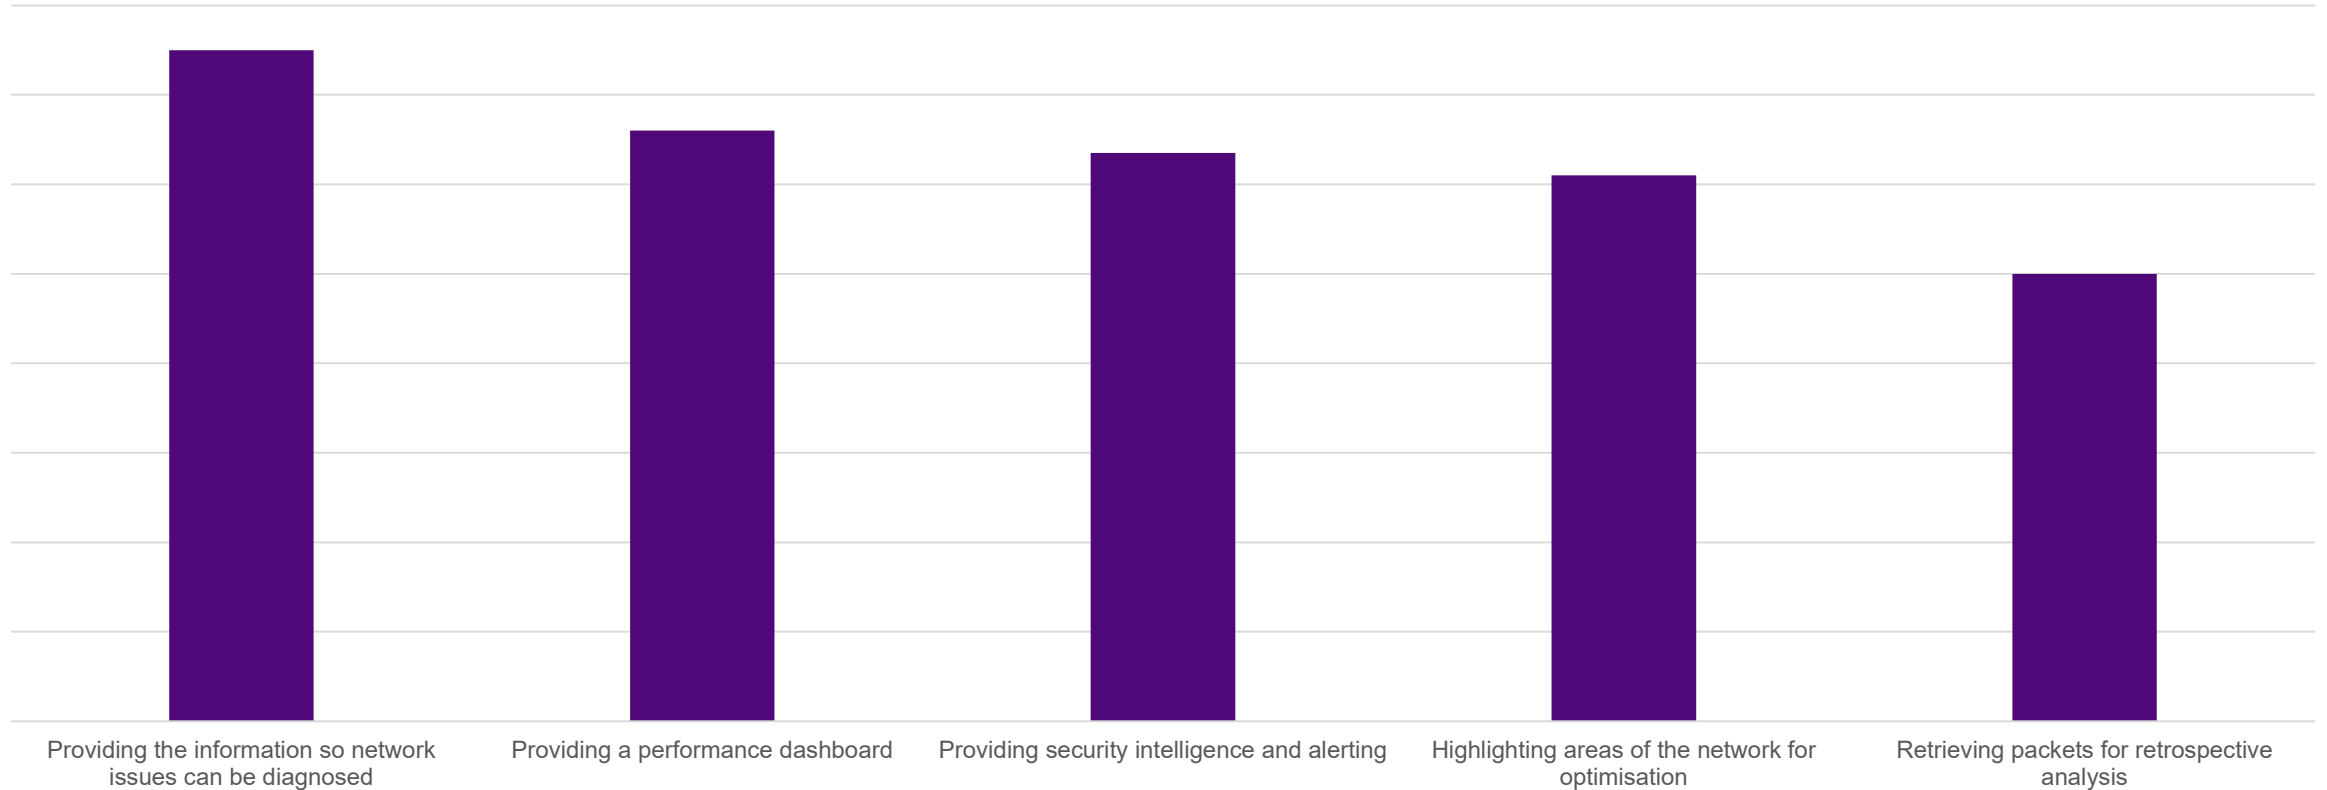

How challenging are the following tasks with your primary NPMD solution?

	Very Easy	Slightly Easy	Average	Somewhat Challenging	Very Challenging
Determining if the root cause of the problem is the network, application or systems	3	9	10	7	4
Gaining visibility of the user experience	6	6	10	6	4
Managing application bugs and/or patching	5	5	14	4	3
Monitoring and managing bandwidth consumption	15	11	3	2	2
Measuring latency and delay issues	16	10	5	0	2

How important are the following features in an NPMD solution?

	Very Unimportant	Slightly Unimportant	Average	Somewhat Important	Very Important
Providing the information so network issues can be diagnosed	0	1	3	6	23
Providing a performance dashboard	0	2	8	11	12
Providing security intelligence and alerting	1	3	8	9	12
Highlighting areas of the network for optimisation	1	3	9	12	8
Retrieving packets for retrospective analysis	5	6	11	5	6
